# **FastCCD Communication Library (libcin)**

#### Introduction

This library, based in C is designed to control the FastCCD detector from Lawrence Berkeley National Laboratory. It controls both camera control functions and data acquisition (frame acquisition). It is separated into two distinct parts, the control part <code>,cin\_ctl</code>, and the data (image) part named <code>cin\_data</code>. It was written in part for use with areaDetector.

# **Prerequisites**

The library relies on the following:

- libbsd (Used for string manipulation)
- libconfig (Used for nice config files)
- libpthread (Used for threading)
- librt (Used for time functions)

#### Installation

Installation of the library is like most unix based source packages:

```
./make
./make doc
./make test
./make install
```

# Versioning

For the versions available, see the tags on this repository.

# **Authors**

• Stuart B. Wilkins - stuwilkins

See also the list of contributors who participated in this project.

# License

This project is licensed under the BSD License - see the  ${ t LICENSE}$  file for details

# **Acknowledgments**

A huge thanks to Peter Dennes, John Joseph and the detector team at LBNL and the team at Sydor Instruments.

# **Module Index**

# 2.1 Modules

# **Module Documentation**

# 5.1 Cin Control Initialization Routines

# **Functions**

- int cin\_ctl\_init (cin\_ctl\_t \*cin, const char \*ipaddr, const char \*bind\_addr, uint16\_t oport, uint16\_t iport, uint16\_t soport, uint16\_t siport)
- int cin\_ctl\_destroy (cin\_ctl\_t \*cin)

# 5.1.1 Detailed Description

#### 5.1.2 Function Documentation

#### 5.1.2.1 cin\_ctl\_destroy()

Destroy (close) the cin control library

Close connections, free memory and exit library

# **Parameters**

```
cin handle to cin library
```

#### Returns

Returns 0 on sucsess non-zero if error

10 Module Documentation

# 5.1.2.2 cin\_ctl\_init()

# Initialize the cin control library

Initialize the control structures and communications with the CIN via the control interface. This function opens the UDP ports and starts a listening thread to recieve packets from the CIN.

#### **Parameters**

cin	handle to cin library
ipaddr	ip address of CIN base address
bind_addr	ip address to bind to
oport	output udp port of cin
iport	input udp port of cin
soport	stream output udp port of cin
siport	stream input udp port of cin

#### Returns

Returns 0 on sucsess non-zero if error

# 5.2 Cin Control Read/Rwite Routines

# **Functions**

```
int cin_ctl_read (cin_ctl_t *cin, uint16_t reg, uint16_t *val)
int cin_ctl_write (cin_ctl_t *cin, uint16_t reg, uint16_t val, int wait)
int cin_ctl_stream_write (cin_ctl_t *cin, char *val, int size)
int cin_ctl_write_with_readback (cin_ctl_t *cin, uint16_t reg, uint16_t val)
int cin_ctl_pwr (cin_ctl_t *cin, int pwr)
int cin_ctl_fp_pwr (cin_ctl_t *cin, int pwr)
```

• int cin\_ctl\_fo\_test\_pattern (cin\_ctl\_t \*cin, int on\_off)

# 5.2.1 Detailed Description

#### 5.2.2 Function Documentation

# 5.2.2.1 cin\_ctl\_read()

Read register from CIN

#### **Parameters**

cin	handle to cin library
reg	register to read
val	variable to read value of register to

#### Returns

Returns 0 on sucsess non-zero if error

#### 5.2.2.2 cin\_ctl\_stream\_write()

Write stream data to CIN

12 Module Documentation

#### **Parameters**

cin	handle to cin library
val	array of values to write
size	size of array pointed to by val

Write stream data to cin in form of 16 bit array.

#### Returns

Returns 0 on sucsess non-zero if error

#### 5.2.2.3 cin\_ctl\_write()

Write register to CIN

#### **Parameters**

cin	handle to cin library
reg	register to write to
val	value to write to register
wait	if non-zero

Write register value to CIN. If wait is non-zero then wait a sleep time of i CIN\_CTL\_WRITE\_SLEEP before releasing the mutex to add flow control to the cin.

#### Returns

Returns 0 on sucsess non-zero if error

# 5.2.2.4 cin\_ctl\_write\_with\_readback()

Write register to CIN with readback verification

#### **Parameters**

cin	handle to cin library
reg	register to write to
val	value to write to register

Write register value to CIN. Follow write with read of register and compare value. CIN\_CTL\_WRITE\_SLEEP before releasing the mutex to add flow control to the cin.

#### Returns

Returns 0 on sucsess non-zero if error

14 Module Documentation

# 5.3 CIN Data Initialization Routines

#### **Functions**

- int cin\_data\_init (cin\_data\_t \*cin, int packet\_buffer\_len, int frame\_buffer\_len, char \*ipaddr, uint16\_t port, char \*cin\_ipaddr, uint16\_t cin\_port, int rcvbuf, cin\_data\_callback push\_callback, cin\_data\_callback pop\_callback, void \*usr\_ptr)
- void cin\_data\_stop\_threads (cin\_data\_t \*cin)

#### 5.3.1 Detailed Description

Initialization group

#### 5.3.2 Function Documentation

#### 5.3.2.1 cin\_data\_init()

#### Initialize the cin data library

Initialize the data handeling routines and start the threads for listening.

#### **Parameters**

cin	Handle to cin data library
packet_buffer_len	Length of packet buffer fifo (in units number of packets)
frame_buffer_len	Length of frame (assembler) buffer fifo (in units of number of frames)
ipaddr	IP-Address to bind to (if NULL binds to 0.0.0.0)
port	UDP Port of host
cin_ipaddr	IP-Address of cin (if NULL defaults to standard)
cin_port	UDP Port of CIN
rcvbuf	TCP/IP Kernel recieve buffer size
push_callback	This function is called when a data structure is needed
pop_callback	This function is called when an image has been processed
usr_ptr	Pointer passed to callback functions

# 5.3.2.2 cin\_data\_stop\_threads()

# Stop all threads and wait

Stop all the processing threads and join them to the main thread. This function blocks until all threads have joined the main thread (program). This should be called to clean up the library before the program is exited

# **Parameters**

cin | Handle to cin data library

16 Module Documentation

# 5.4 CIN Data Framestore Functions

#### **Functions**

- void cin\_data\_framestore\_trigger (cin\_data\_t \*cin, int count)
- void cin\_data\_framestore\_skip (cin\_data\_t \*cin, int count)
- int cin\_data\_get\_framestore\_counter (cin\_data\_t \*cin)
- void cin\_data\_framestore\_disable (cin\_data\_t \*cin)
- void cin\_data\_framestore\_trigger\_enable (cin\_data\_t \*cin)

# 5.4.1 Detailed Description

Framestore Group

#### 5.4.2 Function Documentation

# 5.4.2.1 cin\_data\_framestore\_disable()

#### Disable the framestore modes

This function disables the framestore modes (software trigger and skip). If the camera is hardware triggering then the images will start to be processed.

#### **Parameters**

```
cin | Handle to the cin library
```

#### 5.4.2.2 cin\_data\_framestore\_skip()

#### Enable framestore skip mode

Enable the framestore skip mode. This function should be called before hardware triggering the camera. This causes the data processing to skip

#### **Parameters**

count	frames from the first images to be read. This is usually done to stop the first few frames from being over exposed.	
cin	handle to the cin_data library	

#### 5.4.2.3 cin\_data\_framestore\_trigger()

#### Send a framestore (software) trigger

Send a software trigger to the CIN by timestamping the request time and allow images to be processed when recieved after this time. The count option sets the number of frames to trigger. A value of -1 indicated that the trigger should not count images but run indefinately after the trigger has occured.

#### **Parameters**

cin	handle to the cin_data library
count	number of frames to trigger

#### 5.4.2.4 cin\_data\_framestore\_trigger\_enable()

# Enable the framestore trigger mode

This function enables the framestore trigger mode. It cases the images to not be processed pending a call to the function to (software) trigger the camera.

#### **Parameters**

```
cin Handle to the cin library
```

# 5.4.2.5 cin\_data\_get\_framestore\_counter()

18 Module Documentation

Get the value of the framestore counter

Return the number of frames in the framestore counter. In trigger mode, this returns the number of frames to go. In skip mode, this returns the number of frames that have to be skipped.

#### **Parameters**

cin handle to the cin\_data library

#### Returns

Number of frames to go in trigger
