Chapter 1

FastCCD Communication Library (libcin)

Introduction

This library, based in C is designed to control the FastCCD detector from Lawrence Berkeley National Laboratory. It controls both camera control functions and data acquisition (frame acquisition). It is separated into two distinct parts, the control part <code>,cin_ctl</code>, and the data (image) part named <code>cin_data</code>. It was written in part for use with areaDetector.

Prerequisites

The library relies on the following:

- libbsd (Used for string manipulation)
- libconfig (Used for nice config files)
- libpthread (Used for threading)
- librt (Used for time functions)

Installation

Installation of the library is like most unix based source packages:

^{./}make ./make doc ./make test

^{./}make install

TCP/IP Stack Tuning

In order for the CIN data to operate efficiently, the 10G interface on the host computer needs to be tuned. This needs to be done by adding the following to the file /etc/sysctl.conf.

```
# Increase the maximum buffer that user programs can request
# 2147483647 = 2048 Mb
net.core.rmem_max=2147483647
net.core.wmem_max=2147483647
# Set a default value 10 times bigger
net.core.rmem_default=1000000
net.core.wmem_default=1000000
# increase the length of the processor input queue
net.core.netdev_max_backlog = 250000
# recommended for hosts with jumbo frames enabled
net.ipv4.tcp_mtu_probing=1
```

These can be reread by the system without rebooting by entering the command:

```
$sudo sysctl --system
```

Versioning

For the versions available, see the tags on this repository.

Authors

• Stuart B. Wilkins - stuwilkins

Module Documentation

5.1 Cin Control Initialization Routines

Functions

- int cin_ctl_init (cin_ctl_t *cin, const char *ipaddr, const char *bind_addr, uint16_t oport, uint16_t iport, uint16_t soport, uint16_t siport)
- int cin_ctl_destroy (cin_ctl_t *cin)

5.1.1 Detailed Description

5.1.2 Function Documentation

5.1.2.1 cin_ctl_destroy()

Destroy (close) the cin control library

Close connections, free memory and exit library

Parameters

```
cin handle to cin library
```

Returns

Returns 0 on sucsess non-zero if error

10 Module Documentation

5.1.2.2 cin_ctl_init()

Initialize the cin control library

Initialize the control structures and communications with the CIN via the control interface. This function opens the UDP ports and starts a listening thread to recieve packets from the CIN.

Parameters

cin	handle to cin library
ipaddr	ip address of CIN base address
bind_addr	ip address to bind to
oport	output udp port of cin
iport	input udp port of cin
soport	stream output udp port of cin
siport	stream input udp port of cin

Returns

Returns 0 on sucsess non-zero if error

5.2 Cin Control Read/Rwite Routines

Functions

```
int cin_ctl_read (cin_ctl_t *cin, uint16_t reg, uint16_t *val)
int cin_ctl_write (cin_ctl_t *cin, uint16_t reg, uint16_t val, int wait)
int cin_ctl_stream_write (cin_ctl_t *cin, unsigned char *val, int size)
int cin_ctl_write_with_readback (cin_ctl_t *cin, uint16_t reg, uint16_t val)
int cin_ctl_pwr (cin_ctl_t *cin, int pwr)
int cin_ctl_fp_pwr (cin_ctl_t *cin, int pwr)
```

• int cin_ctl_fo_test_pattern (cin_ctl_t *cin, int on_off)

5.2.1 Detailed Description

5.2.2 Function Documentation

5.2.2.1 cin_ctl_read()

Read register from CIN

Parameters

cin	handle to cin library
reg	register to read
val	variable to read value of register to

Returns

Returns 0 on sucsess non-zero if error

5.2.2.2 cin_ctl_stream_write()

Write stream data to CIN

12 Module Documentation

Parameters

cin	handle to cin library
val	array of values to write
size	size of array pointed to by val

Write stream data to cin in form of 16 bit array.

Returns

Returns 0 on sucsess non-zero if error

5.2.2.3 cin_ctl_write()

Write register to CIN

Parameters

cin	handle to cin library
reg	register to write to
val	value to write to register
wait	if non-zero

Write register value to CIN. If wait is non-zero then wait a sleep time of i CIN_CTL_WRITE_SLEEP before releasing the mutex to add flow control to the cin.

Returns

Returns 0 on sucsess non-zero if error

5.2.2.4 cin_ctl_write_with_readback()

Write register to CIN with readback verification

Parameters

cin	handle to cin library
reg	register to write to
val	value to write to register

Write register value to CIN. Follow write with read of register and compare value. CIN_CTL_WRITE_SLEEP before releasing the mutex to add flow control to the cin.

Returns

Returns 0 on sucsess non-zero if error

14 Module Documentation

5.3 CIN Control Bias Routines

Functions

- int cin_ctl_set_bias (cin_ctl_t *cin, int val)
- int cin_ctl_get_bias (cin_ctl_t *cin, int *val)
- int cin_ctl_set_bias_regs (cin_ctl_t *cin, uint16_t *vals, int verify)
- int cin_ctl_get_bias_regs (cin_ctl_t *cin, uint16_t *vals)
- int cin_ctl_set_bias_voltages (cin_ctl_t *cin, float *voltage, int verify)
- int cin_ctl_get_bias_voltages (cin_ctl_t *cin, float *voltage)

5.3.1 Detailed Description

Initialization group

5.4 CIN COntrol Timing Routines

Functions

- int cin_ctl_set_timing_regs (cin_ctl_t *cin, uint16_t *vals, int vals_len)
- int cin_ctl_get_timing_regs (cin_ctl_t *cin, uint16_t *vals)

5.4.1 Detailed Description

Timing setup group

16 Module Documentation

5.5 CIN Data Initialization Routines

Functions

- int cin_data_init (cin_data_t *cin, int packet_buffer_len, int frame_buffer_len, char *ipaddr, uint16_t port, char *cin_ipaddr, uint16_t cin_port, int rcvbuf, cin_data_callback push_callback, cin_data_callback pop_callback, void *usr_ptr)
- void cin_data_stop_threads (cin_data_t *cin)

5.5.1 Detailed Description

Initialization group

5.5.2 Function Documentation

5.5.2.1 cin_data_init()

Initialize the cin data library

Initialize the data handeling routines and start the threads for listening.

Parameters

cin	Handle to cin data library
packet_buffer_len	Length of packet buffer fifo (in units number of packets)
frame_buffer_len	Length of frame (assembler) buffer fifo (in units of number of frames)
ipaddr	IP-Address to bind to (if NULL binds to 0.0.0.0)
port	UDP Port of host
cin_ipaddr	IP-Address of cin (if NULL defaults to standard)
cin_port	UDP Port of CIN
rcvbuf	TCP/IP Kernel recieve buffer size
push_callback	This function is called when a data structure is needed
pop_callback	This function is called when an image has been processed
usr_ptr	Pointer passed to callback functions

5.5.2.2 cin_data_stop_threads()

Stop all threads and wait

Stop all the processing threads and join them to the main thread. This function blocks until all threads have joined the main thread (program). This should be called to clean up the library before the program is exited

Parameters

cin Handle to cin data library

18 Module Documentation

5.6 CIN Data Framestore Functions

Functions

- void cin_data_framestore_trigger (cin_data_t *cin, int count)
- void cin_data_framestore_skip (cin_data_t *cin, int count)
- int cin_data_get_framestore_counter (cin_data_t *cin)
- void cin_data_framestore_disable (cin_data_t *cin)
- void cin_data_framestore_trigger_enable (cin_data_t *cin)

5.6.1 Detailed Description

Framestore Group

5.6.2 Function Documentation

5.6.2.1 cin_data_framestore_disable()

Disable the framestore modes

This function disables the framestore modes (software trigger and skip). If the camera is hardware triggering then the images will start to be processed.

Parameters

```
cin | Handle to the cin library
```

5.6.2.2 cin_data_framestore_skip()

Enable framestore skip mode

Enable the framestore skip mode. This function should be called before hardware triggering the camera. This causes the data processing to skip

Parameters

count	frames from the first images to be read. This is usually done to stop the first few frames from being over exposed.
cin	handle to the cin_data library

5.6.2.3 cin_data_framestore_trigger()

Send a framestore (software) trigger

Send a software trigger to the CIN by timestamping the request time and allow images to be processed when recieved after this time. The count option sets the number of frames to trigger. A value of -1 indicated that the trigger should not count images but run indefinately after the trigger has occured.

Parameters

cin	handle to the cin_data library
count	number of frames to trigger

5.6.2.4 cin_data_framestore_trigger_enable()

Enable the framestore trigger mode

This function enables the framestore trigger mode. It cases the images to not be processed pending a call to the function to (software) trigger the camera.

Parameters

```
cin Handle to the cin library
```

5.6.2.5 cin_data_get_framestore_counter()

20 Module Documentation

Get the value of the framestore counter

Return the number of frames in the framestore counter. In trigger mode, this returns the number of frames to go. In skip mode, this returns the number of frames that have to be skipped.

Parameters

cin handle to the cin_data library

Returns

Number of frames to go in trigger

Chapter 6

Class Documentation

6.1 cin_ctl Struct Reference

Public Attributes

- cin_port_t ctl_port
- cin_port_t stream_port
- cin_ctl_config_t config
- cin_ctl_listener_t * listener
- pthread_mutex_t access
